Seamless and Secure Access (SSA)
Manual Configuration Guide
for Windows Mobile 6.1

Wireless @*SG*

# 1   Connect to Wireless@SG via SSA

1.1 Turn on Wi-Fi

Before connecting to Wireless@SGx hotspot, Wi-Fi must be turned on. Please refer to your Windows Mobile device user manual on how to Turn ON your Wi-Fi. Some examples:

a)   HP Windows Mobile phones:

- Go to **Start** > **Settings**

- Click **Connection** tab

- Launch **Wireless Manager**

- If the status of Wi-Fi is "off", click the label Wi-Fi to turn it on.

- The picture below shows that Wi-Fi has been turned on and connected to Wireless@SGx hotspot.

b)   HTC phones:
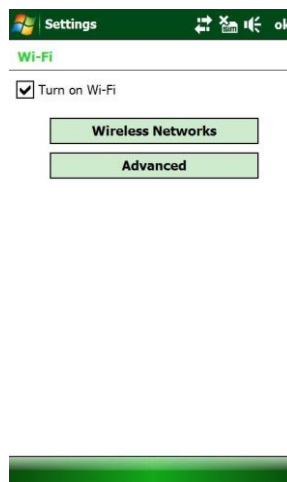

1.2 Launch the Wi-Fi Manager
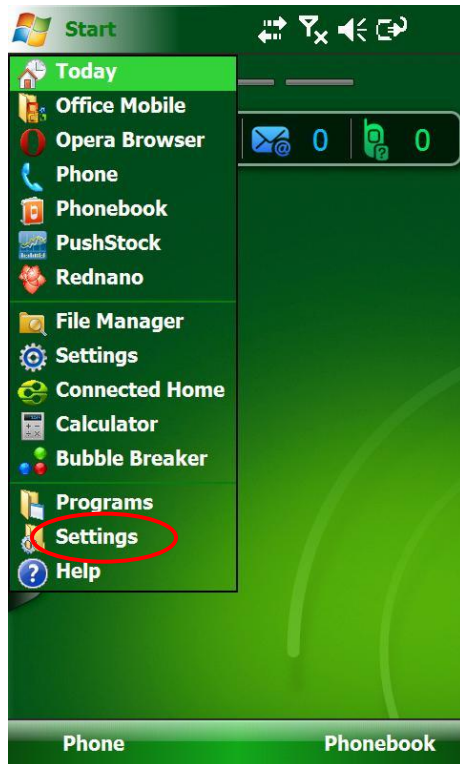

Launch the Wi-Fi Manager as shown:

Please refer to your device user guide on how to locate the Wi-Fi manager. Some examples are:

a)   HP Windows Mobile 6.1 phones*:*

- Go to **Start** > **Settings**

b)   HTC Touch Pro2 phones:

- Go to **Start** > **Setting** > **All Settings**
- Click **Connections**
- Click Wi-Fi
- Check checkbox to Turn ON Wi-Fi
- Click **Wireless Networks**

c)   For Samsung Omnia II phones:

- Go to **Start** > **Settings** (See diagram below)

- Click on **Connection**

- Launch **Wireless Manager**

- Click Wi-Fi button

- Click **Done**

For some devices, there may be a need to change/disable the Windows Mobile Themes to Default Windows Mobile Theme to locate the Wi-Fi manager. Please refer to your device user guide to change/disable the Theme. Some examples are:

a)   For HTC phones:

- Go to **Start**

- Click **Settings**

- Click **All Settings**

- Click **Personal**

- Locate the **Today** theme settings and select **Windows Mobile 6.1** theme

- Click **Ok**

b)   <u>For Samsung Omnia II phones:</u>

- Go to **Start**

- Click **Settings**

- Click **Basic Settings**

- Click **General Setting**

- Click **Samsung TouchWiz UI**

- Click **Button** (See diagram below) to turn off Samsung TouchWiz UI

- Click **Done**

- Click **Done**

- Click **Exit**

1.3 Search for Wireless@SGx hotspot

Under the **Wireless** tab, the available wireless hotspots should be listed as shown below. If Wireless@SGx is nearby, it should be detected and listed.

a)   For *HP Windows Mobile 6.1* and *HTC Touch Pro2*

   - If the Wireless@SGx hotspot does not appear, wait for a few seconds and the phone will automatically rescan for available wireless hotspots.

b)   For *Samsung Omnia II*

   - If the Wireless@SGx hotspot does not appear, click **Search** or wait for a few seconds and the phone will automatically rescan for available wireless hotspots.
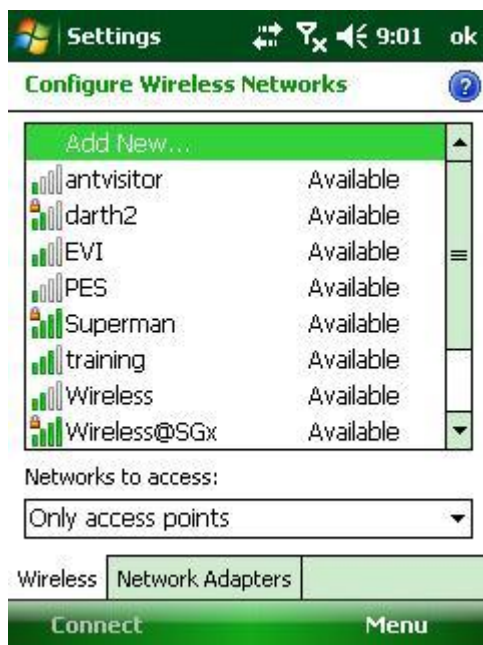

1.4 Configure the Wireless Network

If Wireless@SGx is selected, the "Configure Wireless Network" wizard will be launched. Enter the following settings:

a)   Configure Wireless Network

- **Network name**: Wireless@SGx

- **Connects to:** The Internet

- **This is a hidden network"**: Uncheck

Click **Next** to continue

b)   Configure Network Authentication

- **Authentication**: WPA

- **Data Encryption**: TKIP

Click **Next** to continue

c) Configure Network Authentication

  • **EAP type**: PEAP

Click **Finish** to complete

1.5 Authentication

After the above configurations, Window Mobile will try to connect to the hotspot if the Wireless@SGx network is nearby. You will prompted for authentication details as shown below.

Enter your Wireless@SG username followed by @domain format, and your Wireless@SG password in the Password box. Leave domain blank, check the **Save password** option, and then click **OK** button to connect to the network.

Note:

If the log-in prompt appears again, please click **OK**.

1.6 Check the Connection

Once authentication is successful, "Connected" will appear next to Wireless@SGx:

2   Uninstall SSA profile

In Wi-Fi Manager, select Wireless@SGx, click **Menu** button, and click on the item **Remove Settings** to remove the network configurations.
